PRODUCT INFORMATION

**Distal Calvicular Locking Plate, Twin Hole**
- Holes: 3 – 8
- Direction: Left, Right

**Clavicular Locking Plate, Twin Hole**
- Holes: 4 – 12
- Direction: Left, Right

**Clavicular Hook Locking Plate III, Twin Hole**
- Hook Depth: 15, 18 mm
- Holes: 3 – 8
- Direction: Left, Right

**3.5 mm Locking Screw, Self-tapping**
- Length: 10 – 75 mm

**3.5 mm Cortex Screw**
- Length: 8 – 48 mm (2 mm increments)
- 50 – 75 mm (5 mm increments)

**2.4 mm Locking Screw**
- Length: 6 – 19 mm (1 mm increments)
- 20 – 30 mm (2 mm increments)

+ Swiss Experts in Orthopedics.
**Superior Clavicular Locking Plate System**

1. **Distal Clavicular Plate**
   - Six locking holes in the head of distal clavicle plate enable locking construct and optimal fixation.
   - Divergent and converging 2.4 mm locking screws pattern provide a more stable fixation.
   - Six points of fixation with wide coverage in the distal clavicle provide optimal stress distribution and fixation for multiple fracture patterns.

2. **Clavicular Hook Plate**
   - Fixation of lateral clavicle fractures and acromioclavicular joint dislocations.
   - Two hook sizes provide intraoperative choices.
   - Smooth hook design.

3. **Plate Bending**
   - Recon plate design for easy bending.

4. **Twin Holes, Locking or Compression Fixation**
   - Provides more clinical choices.

5. **Smooth Edges**
   - Highly polished, round edges for minimized soft tissue irritation.

6. **Precontoured Shape**
   - Anatomical contouring curve with excellent fit to clavicle.
